PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience in IT and 3+ years of experience building web applications using **Java, Spring Boot, PHP, Symfony, React, JavaScript, and SQL**. Experienced in designing and implementing **REST APIs**, layered architecture, legacy code refactoring, query optimization, and application performance improvement. Skilled in working in agile environments with cross-functional teams, contributing to both backend and frontend development, system maintenance, and continuous improvement. Currently strengthening my profile through personal projects while deepening my knowledge of software architecture and backend development.

WORK EXPERIENCE

Full Stack Developer – Personal Projects

August 2023 – Present | Remote

- Development of full stack web applications using Java (Spring Boot), PHP (Symfony), React, JavaScript, and MySQL, implementing modern architectures and software engineering best practices.
- Design and implementation of REST APIs and backend services using a layered architecture, applying object-oriented programming principles and modular code organization.
- Development of tomascardoza.dev, a professional portfolio website showcasing technical projects and development skills, deployed in a cloud environment.
- Refactoring of code and improvement of project structure to increase maintainability and scalability of the applications.
- Version control management using Git and GitHub, applying branch-based workflows

Cofarsur – Full Stack Developer (Symfony / Spring Boot)

May 2022 – July 2023 | Full-Time | Remote

- Development and maintenance of full stack web applications using PHP (Symfony), Java (Spring Boot), JavaScript, HTML, CSS, and MySQL.
- Participation in the migration of the backend from Symfony to Spring Boot, collaborating in the architectural redesign and development of new REST APIs.
- Implementation of new system features based on business requirements and internal user needs.
- Refactoring of legacy code and application of development best practices to improve system maintainability and stability.
- Optimization of database queries and backend processes, improving response times and overall application performance.
- Collaboration within an agile environment (Kanban) using Jira and Bitbucket, participating in task planning, code reviews, and coordination with product teams.

Be Innovation Tech – Programming Analyst

March 2022 – April 2022 | Full-Time | Hybrid

- Data migration to a new ERP system.
- Optimization of complex SQL queries, reducing execution times from hours to seconds.
- Improvement of data reliability and overall system performance.

Grupo Serin – Systems Analyst (IT Area)

December 2020 – March 2022 | Full-Time | On-Site

- Administration of SQL Server databases (DDL, DML, DCL).
- Reporting and data analysis using SQL Server Reporting Services (SSRS).
- Development of an internal quality management tool using VB.NET.
- Technical support for Microsoft Dynamics GP.
- Basic network administration using MikroTik.
- Level 2 and Level 3 technical support for internal users.
- Task organization and ticket management using Kanban methodologies.

TECH SKILLS

Backend

Java • Spring Boot • Spring Cloud • PHP • Symfony • Swagger / OpenAPI

Frontend

React • JavaScript • HTML • CSS • Bootstrap • Tailwind CSS • Sass • Vite

Databases

MySQL • SQL Server • PostgreSQL

DevOps & Tools

Docker • CI/CD • Git • GitHub • GitHub Actions • Bitbucket • Linux • AWS Basics • Jira • Agile / Scrum

Testing & QA

Postman • JUnit • TDD • Cucumber (BDD) • Selenium • Allure Reports

LANGUAGES

Spanish: Native

English: B2 / Upper-Intermediate

EDUCATION

Systems Engineering – IUA FCA (2018–2022) – 4/5 years completed

Back End Java Certification – Digital House (2026)

JavaScript Course – CoderHouse (2021)

PHP Course – IUA FCA (2020)
